Certificate of Quality

Statement of Unconditional Quality and Performance Guarantee

Sea Breeze guarantees all products to meet or exceed customer expectations of quality and performance. To obtain these results, ingredients used in the manufacture of our products are of premium grade. In addition, every batch produced is thoroughly tested in our Quality Assurance Laboratory by a highly qualified staff utilizing state-of-the-art equipment; as well as old-fashioned taste buds. Specifically, each batch is sampled and analyzed on accurate testing equipment, such as our digital refractometer and pH meters, which determine brix and acidity measurements. Other varied analyses are routinely performed and recorded.

This guarantee is unconditional as we are fully confident of the integrity of each and every product we manufacture. We are proud of our reputation, gained through the quality of our products and services rendered to our valued customers since 1925. This is a tradition of quality at which we continually work hard to improve and ensure.

Please arrange with your Beverage Specialist to visit our modern facilities as we welcome and look forward to meeting the customers we serve.

*Respectfully,
SEA BREEZE*

Frank Maranino
Technical Director
