

BEFORE CALLING SEA BREEZE FOR BEVERAGE REPAIR SERVICE, PLEASE HELP BY CHECKING:

CO2 GAS:

- Is CO2 gas tank full and the valve open?
- Are CO2 lines free of kinks?
- Is CO2 tank connected?
- Are CO2 regulators set properly?
 - CO2 tank gauge 100 - 110 lbs.
 - BOXES: both sugar and diet flavors minimum 40 - 50 lbs.

SYRUP:

- Do you have syrup in the boxes?
- Are boxes properly & securely connected?
- Are syrup lines free of kinks?

WATER:

- Is water supply valve open?
- If the water supply to the carbonator is turned off for any reason (ie: in-house water line repairs or city water shut off) or if you have a water leak, please disconnect the electric.

ELECTRIC:

- Is the carbonator plugged into a working outlet?
- If you have a countertop dispenser, is it plugged in?
- Is the dispenser turned on?

IF AFTER CHECKING ALL OF THE ABOVE, AND THE DISPENSER STILL DOES NOT OPERATE PROPERLY, PLEASE CALL FOR FRIENDLY SERVICE.
